Sign the petition!

Earlier this year, a group of MP's, cycling organisations and other stakeholders

held a series of meetings to discuss how cycling levels could be increased. Their report

[1] has now been released with 18 recommendations covering five broad topics -

A new priority for investing public funds.
Redesigning our roads, streets and communities.
Safe driving and safe speed limits.
Training and education.
Political leadership.

The Government is now being petitioned to adopt the recommendations of the report.

At the time of writing it had reached over 60,000 signatures. When the petition reaches 100,000 signatures the report can be debated in Parliament, making it visible to the top level of Government.

Please sign this petition and send to all your friends.
